Three Points for Consideration.

During the past five years the VEGETINE has been steadily working itself into public lavor, and those who were at first most incredulous in regard to its merits are now its most ardent friends and supporters.

There are three essential causes for those having such a horror of patent medicines, changing their opinion and lending their influence toward the advancement of VeGETINE. Ist—it is an honestly-prepared medicine from barks, roots and herbs. 2d—It honestly accomplishes all that is claimed for it, without leaving any bad effects in the system. 3d—It presents honest vouchers in testimonials without leaving any bad effects in the system.

3d—It presents honest vouchers in testimontals from honest, well-known citizens, whose signatures are a sufficient guarantee of their earthestness in the matter. Taking into consideration the *ast quantity of medicine brought courticuously before the public through the flaming advertisements in the newspaper columns, with no process of merit or genuine vouch ers of what I has done we would account to the second of the state of the second of
